

Collinear triple of anti-flags in $J[2] \cong V \oplus V^*$

Three points on m : $4 + 5 + 6 = 0$ in V

Three lines through Q : $\ell_1 + \ell_2 + \ell_3 = 0$ in V^*

Each point is colored to match its paired line ($P_i \notin \ell_i$):

$4 \leftrightarrow \ell_2 = \{1, 5, 3\}$, $5 \leftrightarrow \ell_1 = \{1, 6, 2\}$, $6 \leftrightarrow \ell_3 = \{1, 7, 4\}$
